

DJIELA FOMO AYUK PARFAIT

Computer Engineer / Electrical Engineer

Tel: (+237) 652768274 | Email: djielaparfait99@gmail.com

Portfolio: parfait-portfolio-web-app.vercel.app | Location: Buea, Cameroon

SUMMARY

A dedicated and innovative Computer and Software Engineer with a strong passion for full-stack web development, system optimization, and hardware-software integration. Experienced in building responsive frontend systems frameworks using React.js, Next.js, and PHP. Possesses a solid foundation in core electrical engineering concepts, including digital circuits. Proven ability to coordinate technical tasks, troubleshoot complex application issues, and contribute to impactful, multi-disciplinary engineering projects.

EXPERIENCES

11/2025 - 01/2026 Software Developer | Paveway Group

- Built a fully responsive corporate landing page of Paveway Group from scratch using Next.js, optimizing the structure for high performance, modern typography, and clean visual layouts.
- Integrated an English-to-French translation system across the primary landing page to expand market accessibility.
- Partnered directly with the Technical Lead and CEO to integrate sub-pages into the main application branch, successfully managing version control workflows.
- Audited the entire multi-page application to ensure seamless cross-device responsiveness, end-to-end translation synchronization, and global Light/Dark theme functionality.
- Implemented a highly responsive landing page for Brand Buzz Digital, successfully translating provided design layouts into clean, high-performance Next.js code.

08/2024 - 01/2025 Software Developer Intern | Primus Cloud Solutions

- Developed Sendi, an optimized high-performance, dynamic web application utilizing React.js and Next.js.
- Collaborated within a cross-functional development team to implement intuitive, responsive UI/UX designs.
- Troubleshoot, debugged, and performance-tuned application modules to minimize latency and improve user experience.
- Engineered the frontend modules for a team-based School Management System project.
- Built and evaluated backend microservices using Python and the FastAPI framework for the School Management System project.

08/2022 - 2024 Customer Support Volunteer (HR Team) | Ajuoza

- Provided technical assistance to users of the Ajuoza mobile app, a platform designed for recovering lost documents.
- Improved overall user experience by systematically identifying, logging, and reporting application bugs.
- Engaged directly with customers to harvest feedback for continuous software and product enhancement.
- Managed outreach campaigns to evaluate and onboard incoming internship applicants for the company.

08/2022 - 09/2023 Junior Web Developer Intern | Boyong Lab Enterprise

- Built and deployed dynamic web applications using PHP, Angular.js, React.js, HTML, and CSS.
- Assisted in full-stack architecture design and integrated secure RESTful APIs into existing systems.
- Conducted structured application testing and performance optimization tasks.

12/2020 - 01/2021 Electronics Engineering Intern | ICOTEL

- Completed comprehensive practical training in microcontroller architectures, focusing on the specifications, pinouts, and application matrices of various Arduino prototyping environments (Uno, Mega, Nano).
- Formulated and compiled control logic firmware in Embedded C/C++, executing low-level testing workflows by flashing compiled binaries directly onto physical microcontroller boards.
- Built, verified, and debugged physical logic circuits on breadboards, establishing correct wiring configurations for inputs and outputs to ensure reliable electrical logic states during code execution.

12/2019 - 01/2020 Electronics Engineering Intern | Bobvolts

- Conducted hardware troubleshooting and repairs on complex electronic systems, mastering the identification, function, and operational parameters of surface-mount and through-hole passive/active components.
- Utilized engineering schematics and circuit board layouts to read component values, analyze circuit traces, and trace system-level electrical faults.
- Formulated hardware replacement strategies by identifying compatible component alternatives, sourcing correct tolerances, and soldering replacement parts onto compromised circuit boards to restore system functionality.

12/2017 - 01/2018 Electrical Engineering Intern | Chariot Company Ltd

- Collaborated within an engineering response team to systematically trace, troubleshoot, and isolate complex electrical faults across hospitality suites, banquet halls, and central facility infrastructure.
- Developed, assembled, and tested industrial control circuits under zero-fault training windows, successfully wiring Star-Delta motor configurations and Forward/Reverse industrial motor controllers.
- Executed structural building wiring methodologies within localized testing grids, configuring advanced lighting logic structures including specialized multi-point staircase switching networks and comprehensive apartment lighting loops.

PROJECTS

2026 Solar Estimator (Quick-Estimator)

- Built and deployed a highly responsive, glassmorphic SaaS application utilizing Next.js 16 (App Router), React 19, and TypeScript to automate commercial solar asset sizing and pricing.
- Integrated the Vercel AI SDK v6 and Gemini 2.5 Flash to power an interactive chat assistant capable of executing structured math runners via a custom tool schema (calculateEstimate) to instantly return complex, itemized equipment quotes.
- Developed a server-side spreadsheet generation engine using ExcelJS that outputs a branded two-sheet workbook (Summary & Estimate) utilizing custom accounting formats (#,##0" XAF"), automated 30% equipment-to-labor scheduling, and premium visual layouts.

2026 African Herbal Marketplace (Alleviate Organic)

- Architected and deployed a highly responsive e-commerce platform and product catalog using Next.js, leveraging component reusability and modern structural layouts for herbal remedy discovery.
- Optimized front-end rendering performance and visual asset pipelines across complex structural grids to ensure fluid navigation and dynamic page-load efficiency.
- Implemented targeted media breakpoints and custom layouts to maintain visual harmony and interface uniformity from mobile viewports to wide desktop configurations.

2024 CamairTour (Mobile Development & 3D Interaction)

- Designed and built a mobile tourism application using React Native to showcase Cameroonian tourist destinations.
- Integrated location-based services and optimized assets to render 3D interactive images smoothly on mobile devices.

2023 Role-Based Authentication System (Full-Stack)

- Developed a secure user management portal utilizing Angular, Node.js, and Firebase.
- Implemented strict role-based authentication rules requiring mandatory administrator approval for new user tiers.

EDUCATION

2024	Bachelor of Technology (B.Tech) in Computer Engineering College of Technology, University of Buea
2021	Advanced Technical Certificate (ATC) in Electronics Government Technical High School Buea
2020	Intermediate Technical Certificate (ITC) in Electronics Government Technical High School Buea
2018	Certificate of Professional Competence (CAP) in Equipment Electricity Government Technical High School Buea

CERTIFICATES

06/2026 - Present. TELC Deutsch B1

SKILLS

Languages & Frameworks: JavaScript, React.js, Next.js, Angular.js, React Native, Node.js, PHP, Python, HTML & CSS.

Tools & Version Control: Figma, Git & Version Control.

Core Engineering Competencies: Hardware-Software Integration, Problem-solving, Analytical Skills, Technical Troubleshooting, Embedded Systems Development, System Analysis, Leadership & Collaboration.

LANGUAGES

English: Native

French: Intermediate

German: Intermediate
